

Streamlining regulatory compliance and carbon reduction in one platform

„IntegrityNext has been instrumental in our journey towards sustainable excellence. By fulfilling the latest regulatory requirements, including the Norwegian Transparency Act, and enabling the launch of CO₂ Science Based Targets with our supply chain, the platform has empowered us to forge stronger supplier relationships and embrace a more sustainable future.“

Rob Anthony
SVP – Global Supply Chain

Objective

KONGSBERG aimed to transform its supplier sustainability management process into a seamless, efficient, and digital approach. The objective was to select a strategic digital supplier portal that would replace the paper-based system, facilitate collaboration with suppliers (both direct and indirect), and enable compliance with the latest regulatory requirements such as the Norwegian Transparency Act (NTA). The company identified the need for a comprehensive and adaptable platform that could cater to the diverse ESG and sustainability needs across its global businesses.

How IntegrityNext Helps

As an integral part of KONGSBERG’s supplier engagement and onboarding program, IntegrityNext provided a unified platform for managing all ESG and sustainability requirements with suppliers worldwide. Over 1,500 suppliers were registered and the data is seamlessly integrated into PowerBI for better analysis and reporting. Suppliers can digitally approve KONGSBERG’s Supplier Conduct Principles, streamlining the approval process, and ISO certificates can be easily shared and verified, ensuring adherence to international standards.

About KONGSBERG

Industry	Maritime, Defense Aerospace
Annual Revenue	>2,6 bn €
Active Suppliers	8,000
Spend Volume	6,9 bn €
Geographies	Global

Challenges

- Keeping up to date with the increasing regulatory requirements such as the NTA as well as customer demands regarding sustainability and compliance in general
- Oversight and follow-up with suppliers to complete self-assessments

Benefits

Regulatory compliance

The IntegrityNext solution helps KONGSBERG comply with the latest regulatory requirements, including the Norwegian Transparency Act (NTA).

Easy supplier adoption

Suppliers found it easy to adopt IntegrityNext, as there were no fees involved. They can reuse information for multiple customers, reducing redundancy and saving time.

Streamlined process

The digital platform approach reduced administrative burden and streamlined supplier assessments, improving overall efficiency.

Data-driven insights

Data integration with PowerBI enabled better data analysis and reporting, empowering data-driven decision-making.
